Tunis, Tunisia

EXPERIENCE

Full-Stack Developer (Python/Angular)

Pulpetech

Sep 2020 – Current Tunis, Tunisia

- Developed an invoice management system tailored for administrators, the sales team, and technical support
- Designed and deployed an CI/CD pipeline, enabling seamless integration, automated testing, and deployment of code changes to production, resulting in an important reduction in release cycle time
- Created web services using Flask & Django frameworks and integrated various web services Google Ads, Google Shopping, Google Business, Pinterest, Facebook and TikTok
- Set up various scripts and solutions for monitoring, and implemented custom alerts for critical metrics, enabling proactive issue detection and reducing downtime.

Developer Intern

Pulpetech

Mar 2020 – Sep 2020 Tunis, Tunisia

- Acquired in-depth skills in Natural Language Processing (NLP)
- Created a sentiment analysis-based categorization of reviews into multiple categories, aiming to provide insights for supporting business growth and addressing weaknesses.
